TOPLINE GROUP BESTOWS DONATION TO USC FOR CUTTING-EDGE SMART CLASSROOM

A commitment to usher in the future of learning

Top Line Business Development Corp. and Topline Foundation, Inc. (Topline) proudly forged a transformative collaboration with the University of San Carlos (USC) to develop a cutting-edge *smart* classroom for the University, in celebration of the latter's 75th anniversary as a university, under the auspices of its Research, Infrastructure, Scholarship and Endowments Project (RISE Project). In a momentous signing ceremony hosted at the USC Downtown Campus on Thursday, October 12, 2023, Topline donated a substantial sum to fund this initiative.

Distinguished figures from Topline and USC came together to celebrate this exciting partnership, which is poised to redefine the academic experience. Cognizant of an ever-evolving educational landscape, both parties demonstrated their unwavering dedication to quality learning with the aid and benefit of state-of-the-art technology.

The smart classroom is envisioned to empower educators to adapt to modern teaching methods and engage tech-savvy students effectively. Its features will include advanced audio-visual equipment, high-speed internet connectivity, student devices, as well as other similar tools and instruments designed to facilitate a dynamic and interactive learning environment.

In essence, it is designed to prepare students for the future (i.e., a technology-driven workforce) by fostering 21st-century skills, coupled with USC's known brand of learning excellence.
